<sup>4</sup> Source: SPA/RAC and MedPAN, MAPAMED 2019 edition.

<sup>5</sup> The extent of ABNJ in the Mediterranean depends on the number of EEZs declared by coastal States. If all the coastal States declare their EEZ, there will be no more ABNJ.

<sup>6</sup> Figure to be updated by SPA/RAC on the following versions of the draft document (information requested from the Pelagos Agreement Permanent Secretariat).

<sup>7</sup> No-Take Zones are geographically defined zones within marine protected areas that do not allow any fishing, mining, drilling, or other extractive activities.

**Annex XVIII**  
**Draft Programme of work of SPA/RAC for the biennium 2026-2027**

**Narrative introduction to the draft activities and deliverables proposed by SPA/RAC  
to 2026-2027 PoW**

1. The *activities and deliverables of the UNEP/MAP POW 2026-2027, proposed by SPA/RAC* have been prepared following the guiding elements included in the “Guiding elements for the preparation of 2026-2027 UNEP/MAP Programme of Work (PoW)” prepared by the Secretariat. As this marks the third and last biennium of the MTS cycle (2022-2027), most of the proposed activities are in continuation of those started in the present biennium to implement relevant priority actions included in the existing regional strategies already adopted by the Contracting Parties to the Barcelona Convention as well as those newly adopted at their 23<sup>rd</sup> meeting (COP 23, Portorož, Slovenia, 5-8 December 2023).
2. In developing the *activities and deliverables of the UNEP/MAP POW 2026-2027, proposed by SPA/RAC*, due consideration has been given to the contribution of its expected deliverables to the achievement of the 2022-2027 MTS programmes’ objectives, strategic outcomes and related targets. Special attention is given to long-term strategic outcomes that require sustained efforts beyond a single biennium, such as threatened and endangered species and habitats conservation, ecosystem restoration, nature-based technical solutions, mass mortality linked to heat waves, marine and coastal protected areas establishment and management, SPAMI periodic review, EcAp/IMAP activities, etc.
3. The *activities and deliverables of the UNEP/MAP POW 2026-2027, proposed by SPA/RAC* aim at assisting the Contracting Parties in the implementation of the Specially Protected Areas and Biological Diversity (SPA/BD) Protocol, in particular, by protecting, preserving and managing, in a sustainable and environmentally sound way, areas of particular natural or cultural value, notably by establishing and fostering effective management of specially protected areas and by protecting, preserving and restoring threatened or endangered species of flora and fauna, and their habitats, in line with the SPA/RAC mandate.
4. The *activities and deliverables of the UNEP/MAP POW 2026-2027, proposed by SPA/RAC* have been developed considering the priorities defined in the Post-2020 SAPBIO, the Post-2020 Regional Strategy for marine and coastal protected areas (MCPAs) and other effective area-based conservation measures (OECMs) in the Mediterranean, adopted by the Contracting Parties at their 22<sup>nd</sup> meeting, and the Regional Action Plans and Strategy on threatened and endangered species and key habitats. Its deliverables aim at contributing, based on the available budget (both MTF and externally mobilized funds), to the implementation of Instruments and Decisions taken by the Contracting Parties to the Barcelona Convention: the Protocol concerning Specially Protected Areas and Biological Diversity in the Mediterranean (SPA/BD Protocol); in particular COP 22 Decision IG.25/1 UNEP/MAP Medium-Term Strategy 2022-2027, Decision IG.25/11 Post-2020 Strategic Action Programme for the Conservation of Biodiversity and Sustainable Management of Natural Resources in the Mediterranean Region (Post-2020 SAPBIO), Decision IG.25/12 Protecting and conserving the Mediterranean through well connected and effective systems of marine and coastal protected areas and other effective area-based conservation measures, including Specially Protected Areas and Specially Protected Areas of Mediterranean Importance, Decision IG.25/13 Action Plans for the conservation of species and habitats under the Protocol concerning Specially Protected Areas and Biological Diversity in the Mediterranean (Antalya, Türkiye, 7-10 December 2021), Decision IG.26/5 Specially Protected Areas (SPAs), Specially Protected Areas of Mediterranean Importance (SAPMIs) and ecosystem restoration, Decision IG.26/4 Amendments to annexes II and III to the Protocol concerning Specially Protected Areas and Biological Diversity in the Mediterranean, Decision IG.26/3 The 2023 Mediterranean Quality Status Report and a renewed ecosystem approach policy in the Mediterranean and IG.26/14 Programme of Work and Budget for 2024-2025 Portorož, Slovenia, 5-8 December 2023).
5. The *activities and deliverables of the UNEP/MAP POW 2026-2027, proposed by SPA/RAC* also consider relevant current and emerging global and regional frameworks and processes, including SDG 5.5, 13.2, 14.1, 14.2, 14.4, 14.5, 12.2, 15.5, 15.1, 15.8, 15.9, 15.a, 17; UN Convention on Biological Diversity

COP 15 outcomes and particularly the Kunming-Montreal Global Biodiversity Framework (GBF), UNFCCC and Paris Agreement, UN Decade on Ecosystem Restoration (2021-2030), UN Decade of Ocean Science for Sustainable Development (2021-2030), the international legally-binding instrument under the UN Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction (BBNJ), etc.

6. The *activities and deliverables of the UNEP/MAP POW 2026-2027, proposed by SPA/RAC* are developed mainly under six MTS Programmes, namely, “Towards Healthy Mediterranean Ecosystems and Enhanced Biodiversity”, “Towards a Climate Resilient Mediterranean”, “Governance”, “Together for a Shared Vision of the Mediterranean Sea and Coast” and “Towards a Stronger Advocacy, Awareness, Education and Communication of the Mediterranean Sea and Coast”. Particular attention will be paid to the collaboration with other MAP Components toward a more integrated MAP action and to the cooperation with relevant regional partners with the aim to achieve a more coherent and inclusive regional partnership.

#### **MTS Programme “Towards Healthy Mediterranean Ecosystems and Enhanced Biodiversity”**

7. The main objective of the *activities and deliverables of the UNEP/MAP POW 2026-2027, proposed by SPA/RAC* under this programme is to support the Contracting Parties in their efforts towards improving ecosystem resilience through restoration of those with best regeneration potential, to assist them in establishing, expanding and effectively managing a comprehensive, coherent and effective Mediterranean network of MCPAs and OECMs, based on the orientations and priorities of the Post-2020 SAPBIO, Post-2020 Regional Strategy for MCPAs and OECMs, the Kunming-Montreal Global Biodiversity Framework, and other relevant global frameworks and targets, improving the status of conservation of Mediterranean endangered and threatened species and key habitats and minimizing non-indigenous species introductions and controlling their introduction pathways. More specifically, the proposed activities and deliverables envisage to assist the Contracting Parties to identify and implement national measures to restore the most resilient marine and coastal habitats, as a means to allow successful restoration experiences during the UN Decade for Ecosystem Restoration and build capacities for more challenging ones in the future, including through the elaboration of tools and guidelines, specific training and countries’ field actions in collaboration with Plan Bleu, PAP/RAC and REMPEC as well as relevant regional and national organisations for many of the proposed activities, through:

- supporting the Contracting Parties in protecting and conserving the Mediterranean Sea through well-connected, ecologically representative and effective systems of marine and coastal protected areas (MCPAs) and other effective area-based conservation measures (OECMs), and in particular through declaring and extending their MPA/Specially Protected Areas of Mediterranean Importance (SPAMIs) and Particularly Sensitive Sea Areas (PSSAs), identifying and reporting OECMs, including transboundary areas and in Areas Beyond National Jurisdictions (ABNJ), designating protected areas with enhanced protection levels, and enforcing efficient management measures for their long-term conservation.
- Assisting the Contracting Parties for the evaluation of the existing SPAMIs (through the SPAMI periodic review for 10 sites) and strengthening effective SPAMI management through continuing and fostering SPAMI Twinning Programmes.
- ensuring continuous knowledge enhancement, management measures definition and implementation, conservation status assessments of marine and coastal species and habitats covered by the updated Regional Action Plans and the Annex II and III to the SPA/BD Protocol, in line with the IMAP requirements, data knowledge and experience sharing, networking and capacity building programmes organisation (scientific symposia and conferences, workshops and thematic regional, sub-regional and national training sessions), regional action plans/strategy update, National Action Plan elaboration improvement and adaptation of measures to mitigate the impact and interaction with anthropogenic activities and/or climate change.

- undertaking state of play on existing practices and measures for biodiversity restoration including their scientific evaluation and sharing best practices applicable to the Mediterranean, as well as through implementing pilot/demonstration and concrete actions, when possible and appropriate.

### **MTS Programme “Towards a Climate Resilient Mediterranean”**

8. The main objective of the *activities and deliverables of the UNEP/MAP POW 2026-2027, proposed by SPA/RAC* under this programme is to support the Contracting Parties in identifying and implementing nature-based technical solutions to prevent or reduce the impact of climate change on marine and coastal. More specifically, the proposed activities and deliverables envisage assisting the Contracting Parties through:

- improving the national capacities on Climate change adaptation planning in particular to address issues affecting marine resources and fisheries sector, in coastal areas

### **MTS Programme “Governance”**

9. The main objective of the *activities and deliverables of the UNEP/MAP POW 2026-2027, proposed by SPA/RAC* under this programme is to contribute to the effective implementation and enforcement by the Contracting Parties to the Barcelona Convention and its Protocols, of MAP Policies, the MSSD and Programmes of Measures achieved at regional and national levels. The aim is to ensure policy coherence and complementarity among relevant work at global, regional and national levels and among MAP-Barcelona Convention system’s policy and regulatory instruments, to enhance partnerships and multi-stakeholder engagement including with the private sector, civil society organisations and science-policy interface and the implementation of coordinated approaches to strengthen public institution capacities for the implementation of the Barcelona Convention and its Protocols with the guidance and collaboration of the Coordinating Unit. More specifically, the proposed activities and deliverables envisage to assist the Contracting Parties through:

- Organising the Eighteenth Meeting of the SPA/BD Focal Points and the Post-2020 SAPBIO National Correspondent and Advisory Committee meetings.
- Conducting the elaboration of the mid-term (2026) evaluation of the Post-2020 Regional Strategy on MCPAs and OECM in the Mediterranean, through its Evaluation and Monitoring Framework, with conclusions and recommendations for the Strategy implementation by 2030.
- Supporting National Biodiversity Strategic Action Programmes (NBSAPs) elaboration in alignment with the Post-2020 SAPBIO.
- Bilateral working exchanges with global and regional institutions of relevance for the implementation of the Post-2020 SAPBIO actions linked to their prerogatives.
- Promoting the title of “Partner” to the Regional Action Plans for the conservation of threatened or endangered species and marine key habitats: “Regional Action Plans Partners”.
- Updating and promoting the funding proposals prepared within the Post-2020 SAPBIO Resource Mobilisation Strategy (RMS), in consultation with the Contracting parties, the other MAP Components, the SAPBIO Advisory Committee, to further support the Contracting Parties in implementing the Post-2020 SAPBIO priority actions, the Post-2020 Regional Strategy for MCPAs and OECMs and the regional Action Plans

### **MTS Programme “Together for a Shared Vision of the Mediterranean Sea and Coast”**

10. The UNEP/MAP POW 2026-2027, proposed by SPA/RAC, aims to enhance IMAP monitoring, capacity building, and citizen survey guidance to ensure the provision of updated, quality-assured data particularly through the implementation of the EU-funded projects SEMPA and EcAp Med Plus. This data will support decision-making by the Contracting Parties, facilitate GES assessment, and strengthen a science-based IMAP. The programme also focuses on advancing Ecological Objective 4 on marine food webs and improving common indicators for pelagic habitats.

More specifically, the proposed activities and deliverables envisage to assist the Contracting Parties through:

- Continuing the supporting of the development and implementation of National/Sub-regional Monitoring Programmes in line with the biodiversity cluster of IMAP and reporting results through the IMAP Info System.
- Continuing the development of the IMAP Ecological Objective 4 on marine food webs under the Barcelona Convention and the development of EO1 CI1 and CI2 on pelagic habitats.
- Developing citizen survey guidance for NIS monitoring under IMAP to strengthen public awareness and participation.
- Providing national assistance and capacity building activities for the implementation of EO1 and EO2
- Developing and updating the common indicators factsheets related to Biodiversity (EO1) and Sea-floor Integrity (EO6)

### **MTS Programme “Towards a Stronger Advocacy, Awareness, Education and Communication of the Mediterranean Sea and Coast”**

The main objective of the activities and deliverables proposed by SPA/RAC under the UNEP/MAP PoW for 2026-2027 is to sensibilise stakeholders and policymakers about key environmental priorities, promote solutions and initiatives for biodiversity conservation and sustainable development, foster synergies with national and regional partners for greater impact and sustainability, support digital transformation by leveraging digital technologies to strengthen networking and MAP’s visibility, in coordination with INFO/RAC. More specifically, the proposed activities and deliverables aim to assist the Contracting Parties by:

- Developing communication materials and organising events to enhance the engagement of key actors and decision-makers and raise their involvement in biodiversity conservation actions, including those related to marine protected areas, threatened and endangered species & habitats and the sustainable use of marine resources in the Mediterranean, while showcasing best practices, collective achievements, and the impact of conservation and management actions.
- Organizing the SPAMI Day and awarding SPAMI Certificates.
- Producing communication materials, conducting awareness campaigns, and organizing local events with national and local stakeholders to highlight the socio-economic and ecological benefits of conservation for local communities.
- Enhancing networking and increasing visibility through online tools, while assessing and implementing improvements via the update of the communication strategy.

12. The *activities and deliverables of the UNEP/MAP POW 2026-2027, proposed by SPA/RAC*, are built on and aim at strengthening the result-based management (RBM) approach that has been already followed in the previous PoW cycles as well as the integration, to the extent possible, of the UNEP/MAP work.

13. Lessons learned from previous biennia have also been taken into consideration, particularly in terms of the feasibility of planned deliverables, implementation flexibility to be considered when programming, the number and size of planned actions and how to consolidate activities of a similar nature.

16. The *activities and deliverables of the UNEP/MAP POW 2026-2027, proposed by SPA/RAC*, consist of the following elements: the MTS 2022-2027 programmes and outcomes under which the PoW is developed. Under each outcome, are presented, respectively, the main activities and expected deliverables that would be produced, as well as the Lead Component (i.e., SPA/RAC), the other Components expected to contribute to the activity and the partners that would be involved to achieve the expected deliverables. Are, also, indicated in the tables for each main activity, the core MAP mandates and COP decisions as rationale that supports its relevance, as well as the SDG’s references and global agenda to which it is linked.

| Programme 1. Towards a Pollution and Litter Free Mediterranean Sea and Coast Embracing Circular Economy                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                |                                                              |                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                              |
